

**CLEANWATER
GROUP**

KEEPING POLLUTION **AWAY** _____

FROM OUR BEACHES, RIVERS
AND WATERWAYS

Water is a big part of our Aussie lifestyle; both our economy and our livelihood. We're incredibly passionate about keeping pollution away from our beaches, rivers and waterways. It's what we do all day, everyday, for organisations big and small.

Cleanwater Group is an owner-operated stormwater management company committed to creating clean, sustainable coastlines and healthy waterways. We work throughout Australia, with the bulk of our work focused on Australia's most heavily populated stretch of coastline – spanning Queensland, New South Wales and Victoria.

TURNING THE TIDE ON WATER POLLUTION

TURNING THE TIDE ON WATER POLLUTION

Why us?

Cleanwater Group is motivated by a genuine desire to “turn the tide on water pollution”. Our Mission is to act now to effectively and measurably remove and reduce the volume of waste entering our waterways, oceans and landfill, whilst empowering an environmentally responsible culture.

What we do

We design, fabricate, inspect, clean and maintain gross pollutant traps. We have a thirst to innovate and a knack for solving problems. It’s a combination we’re proud of. And we have our sights set on the big picture – creating clean, sustainable coastlines and healthy waterways for all to enjoy. This is why we work collaboratively with local government, community groups, private enterprise, schools and not-for-profits to educate and advocate, and not just as a private business out to make a buck.

Our services

- **Drain Buddy** – an innovative, customisable product for new and existing stormwater drains. We supply, install and maintain.
- **End-to-end stormwater management** – a full service, including stormwater drain assessments, cleaning and excavations, product supply and install, data collection and analysis, and detailed maintenance reporting including photo evidence.
- **Circular waste management** – we create usable products from collected plastics.

Ahead of its time

Cleanwater Group is an innovative company founded in the 1990s, long before sustainability became a buzzword. The passion that was poured into the foundations of the company remains today.

Beach clean ups

We work alongside a growing movement of people, community organisations and ecologically responsible businesses to clean up beaches and rivers, in attempt to remove plastic pollution and marine debris entering our waterways and ocean. We realise volunteer clean ups are not long-term solutions, but they are essential fixes.

Action starts now

Currently, there is a global movement focused on reducing waste by removing single-use plastics like straws, bottles and shopping bags from daily living. Cleanwater Group is 100% behind this movement and is helping to create a world where stormwater drains are 100% rubbish free. Until that happens, we will continue removing plastics and pollutants from stormwater drains, rivers and oceans. Join us; be part of the change.
