

Dear Customers and Partners,

The potential of operational data to improve business processes, reduce waste and facilitate digital business models is enormous and – still – largely untapped, but can only be achieved through an integrated and coherent strategy from the source of the data to the dashboard or predictive model. That's why the Optimate Services and Solutions approach is built on four practices that hold the core of our capabilities. From the core of process control and device-generated data, via data integration and acquisition in historian solution, contextualisation and data quality management, to sensible visualisation and advanced modelling that drives better decisions.

But it's not only what we do, but also how we do it. Driven by our core values of Accountability, Collaboration, Trust and Transparency, our approach is consultative, honest and result-focussed. We understand no one solution will be the same for every client, and circumstances change. The foundation we build with you today will enable a long-term solution for your every data need now and in the future. We welcome you to come on this journey with us and letting us showcase to you how our Capabilities will best serve you.

Kind regards,

Francois Mevis
CEO

About Us

For over 20 years Optimate has been a leading consultancy and integration company in the field of operational data.

Optimate integrates and combines operational, real-time data from contrasting sources into meaningful and valuable end-user information.

Our services cover the end-to-end path of Operational Data, from Process Control & IOT, Integration & Storage, Context & Quality to finally Information & Insight. This places reliable trusted data in the hands of stakeholders allowing them to generate groundbreaking insights instead of fixing integration and quality issues.

Our skills and experience have been recognized across multiple industries, inside Australia and abroad. These award-winning solutions are also a result of how we work and execute against our values of Accountability, Collaboration, Trust and Transparency.

If you have operational data, you can trust Optimate to enable operational intelligence.

POWERING OPERATIONAL INTELLIGENCE

OPERATIONAL DATA VALUE CHAIN

Information & Insight

From Data to Insight

- Data Modelling & Industrialisation
- Visualisation & Reporting
- Automatic Event Detection
- Advanced Analytics Enablement

Context & Quality

From Producer to Consumer

- Data Contextualisation
- Data Quality
- Change Management

Integration & Storage

From Operations to Business Technology

- Real-time Data Integration
- Data Foundation
- System Health & Security

Process Control & IoT

From Physical to Digital

- OT and IT Convergence
- OT Optimisation
- OT Cyber-security

Optimate are Operational Data Integrators. From sensor to insight and from control room to board room, Optimate helps customers unlock the true value of operational, real-time data.
